

# TCS FLOOD TROOPER

**Exceptional Vacuum Strength  
Experience the Honda iGX800**

The TCS FLOOD TROOPER is a no-frills water extraction machine designed primarily for the professional water damage restoration contractor. No pump. No heater. Just raw vacuum power. With 331 CFM of available airflow and the most lift of any TCS truckmount, the FLOOD TROOPER effectively removes large volumes of water from as far away as 500 feet. The 100 gallon waste tank allows for extended operation between stops for disposal. Optional automatic waste pump-out available for continuous operation on larger jobs.
