

TCS WARRIOR

Superior Performance Unbeatable Value

The WARRIOR is one of the most popular and affordable models in the TCS line of truckmounts. It is not a typical "entry level" system. The Honda GX-630 engine provides plenty of fuel-efficient muscle. Also, because of our unique console design, the 3L DSL blower outperforms other blowers in its class without the need for grease fittings. Just like every truckmount we build, the heating system delivers consistent temperatures that exceed the highest industry standards even during hard surface cleaning. In other words, the TCS WARRIOR is all you need to get spectacular results on any residential or light commercial job. With a General pump and clutch as standard features, the WARRIOR is an excellent choice for cleaners and restorers who are ready to upgrade from portable extractors.

Specifications & Accessories

- Honda GX-630
- Sutorbilt™ 3L DSL vac blower @ 288 CFM
- General EP Series solution pump EP1810S17

Warrior Truckmount Options & Upgrades

WE OFFER A VARIETY OF INSTALLATION OPTIONS

The TCS WARRIOR is designed to be in at least a standard length 3/4 ton cargo van. If you don't already have a vehicle we can help you find the best prices on new and used vans as well as excellent financing options for the entire package.

Installation available for Chevrolet, Nissan, Ford & Dodge vans as well as box trucks and trailers. DOT approved tanks, auxiliary fuel tanks, and fuel tap kits are installed at TCS in Atlanta (additional distributors and vendors throughout the United States).

TCS can include a custom trailer with your truckmount purchase. Tandem axles, a flat front, and extra height make a TCS trailer an excellent choice for cleaners who already have a pickup truck or just want to save money on their first complete truckmount system.

Box Trucks are great options for companies that need to keep all their tools close at hand. If your box doesn't have a side door, the entire TCS WARRIOR system can fit along the side walls. Or TCS can have a side door professionally installed for you which will allow for more floor space.

LET US HELP YOU ACHIEVE THE RIGHT TRUCKMOUNT INSTALLATION OPTIONS FOR YOU
