

TCS FLOOD TROOPER II

High-Powered, Professional Water Extraction Machine

The TCS FLOOD TROOPER II is a no-frills water extraction machine designed primarily for the professional water damage restoration contractor. No pump. No heater. Just raw vacuum power. With 495 CFM of available airflow and the most lift of any TCS truckmount, the FLOOD TROOPER II effectively removes large volumes of water from as far away as 500 feet. The 100 gallon waste tank allows for extended operation between stops for disposal. Optional automatic waste pump-out available for continuous operation on larger jobs.
